Liebherr Group

Global success: The Liebherr Group

Liebherr is a third-generation, family-owned company founded in 1949 by Hans Liebherr with his ground-breaking invention of the world's first mobile tower crane.

With over 70 years of success, Liebherr is known as a pioneer in high-quality, breakthrough innovations and countless cutting-edge technologies in numerous industries. One of the world's largest manufacturers of construction machinery, Liebherr has expanded its broadly diversified portfolio to 13 product segments including earthmoving, deep foundation machines, mobile and crawler cranes, tower cranes, concrete technology, material handling technology, mining, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotel, and refrigeration and freezing. The company currently employs about 48,000 people in more than 140 companies in over 50 countries worldwide.

Refrigeration and freezing

Liebherr-Hausgeräte GmbH, Germany

Liebherr-Hausgeräte – specialists in refrigeration and freezing

Liebherr-Hausgeräte covers the full range of refrigeration and freezing for domestic and commercial use. Headquartered in Germany, Liebherr-Hausgeräte has an impressive range of more than 3,000 products in its portfolio.

Quality

Even the smallest detail deserves the utmost attention.

We prioritise uncompromising quality – down to the tiniest screw. And we have done so from the very start. We have been manufacturing high-quality refrigerators and freezers and selling them worldwide since 1954. However, at heart we are still a family business with deep roots in Germany. It is here that we continue to develop all our products just as before. German engineering – out of loyalty to our founder and with the knowledge built up by generations of engineers.

Built to last

You can experience our quality standards in the smallest of details. For example, before a door hinge is approved by us, it must pass through at least 100,000 opening cycles. This corresponds to a usage period of more than 15 years. We also test all other functional parts to ensure that they can last just as long.

And if, contrary to expectations, a small detail no longer meets your requirements, you or our premium service partners can usually correct it quickly. Because all our appliances are extremely repair-friendly. We keep all essential spare parts in stock for well over 10 years. This practice is not just sustainable, it also saves you money on minor repairs or the purchase of a new appliance.

 German Engineering

EasyFresh for fruit and vegetables from the Pure series upwards.

534.76.731 (XRFbsh 5265) ◊ Prime series

Magnetic door gasket ensures safe closing.

We don't just say it. We also guarantee it.

During manufacturing we inspect all components of our refrigerators with great care and test them far more rigorously than required by law – and we do this for the last time just before they are packaged. It is only then that our appliances can relax a little. All of our manufacturing sites are certified in accordance with the international standards for quality ISO 9001, energy management ISO 50001 and environmental management ISO 14001. Therefore, nothing could be easier for us than to guarantee for at least two years that our products are free of material and manufacturing faults and are particularly easy to install.

In short: one thing is certain – you will be able to enjoy your Liebherr for a long time.

Freshness technologies

Uncompromising freshness

You don't compromise when you're shopping. You look for natural ingredients, the best quality and maximum freshness. Of course, anyone who values good food wants to keep it fresh for as long as possible. That is precisely why we have developed innovative freshness technologies and improve them year after year, so your food still tastes fresh after some time in the refrigerator.

Freshness technologies

EasyFresh – ideal for fruit and vegetables

Unpackaged fruit and vegetables feel right at home here. Stored at the same temperature as the fridge compartment and sealed airtight in the safe, lettuce, for example, is still crisp and fresh after 7 days.

BioFresh – our all-rounder

The reliable BioFresh technology stores groceries at a temperature just above 0 °C, much cooler than in the rest of the appliance. With the perfect humidity, fruit and vegetables stay fresh even longer in the airtight Fruit & Vegetable safe. Meat, fish and dairy products can enjoy ideal conditions in the Meat & Dairy safe.

BioFresh Professional with HydroBreeze

A cold mist that covers fruit and vegetables like a protective balm. It ensures crisp freshness and improves structure – the special wow effect for fruit and vegetables in the BioFresh Professional safe.

BioFresh Professional with Fish & Seafood safe.

Particularly delicate foods like fish and seafood are best stored in icy temperatures and at low humidity. The constant temperature of -2 °C in the Fish & Seafood safe is therefore ideal to keep these items tasting fresh for longer.

DuoCooling – no drying out

The two completely separate refrigeration circuits ensure that there is no air exchange between the fridge and freezer compartments. Groceries do not dry out nor spread odour.

NoFrost – no more defrosting

The automatic defrosting function guarantees that frozen foods remain fresh. There is no longer a need to store frozen food temporarily during manual defrosting. The constant optimal freezing remains the same without interruptions.

BioFresh Professional with HydroBreeze

Cool and misty. Perfect weather for your vegetables.

Our HydroBreeze feature exemplifies our highest standard of freshness. A cold mist covers fruit and vegetables like a protective balm in the BioFresh Professional safe. The mist ensures crisp freshness, improves structure and keeps produce with fine leaves fresh for longer. It also creates an optical wow effect in the BioFresh Professional safe.

Nature's freshness secret

The Salinas valley in California is known as the salad bowl of the USA. And that is because of the particularly favourable climatic conditions. Its proximity to the cool waters of the Pacific means a fine, moist mist covers the valley and its fields in summer. This prevents the crops growing here from drying out. It is precisely this idea which inspired our BioFresh Professional with HydroBreeze.

Every time the door is opened, a fresh, cold mist is generated.

Specifications made in days are comparisons
to the normal fridge compartment.

Relish the freshness of the sea.

To keep fish and seafood tasting as fresh as at the market stall, even after a few days, you need a fridge compartment which maintains their freshness; such as our Fish & Seafood safe. Fish and seafood can be stored here at -2°C and low humidity. Perfect conditions to enjoy that freshly caught flavour for much longer.

Specifications made in days are comparisons to the normal fridge compartment.

BioFresh Professional with Fish & Seafood safe

Flexible use

The surface of the BioFresh Professional safe can be adjusted to individual requirements. The -2°C can be partially or even completely adjusted to a temperature zone at just above 0°C . This is the optimal storage environment for meat and dairy products. We have illustrated these four options below:

Convenience and flexibility

Drawers on telescopic rails

Pleasantly easy opening and closing – even when fully loaded – ensures that all of the groceries are perfectly accessible.

FlexSystem

Ensures clear order in the BioFresh safe. It is perfect for storing smaller portions of fruit and vegetables or sensitive groceries.

VarioSafe

Allows you to arrange smaller items clearly in the interior – at whatever height you prefer.

Variable temperature space as required

With VarioTemp, there is flexibility for every situation. The freezer compartment can be adjusted to a variable temperature between -2°C and 14°C .

As a result, you are always perfectly prepared, even for big parties. If necessary, the freezer compartment can be used as an additional cooling zone for appetisers or drinks. Or as a cellar compartment for groceries that are sensitive to cold, such as potatoes, onions and other similar items.

Your family has grown and you are running out of space in your fridge-freezer? Not a problem. VarioTemp allows you to use the freezer compartments as a fridge in your kitchen. If combined with a separate freezer, this means you have enough space to supply even a large family with fresh groceries.

Use as freezer compartment (-18°C)

**Use as fridge compartment
(between -2°C and $+9^{\circ}\text{C}$)**

Use as cellar compartment ($+14^{\circ}\text{C}$)

Thinking beyond just today

We are fastidious in adopting a holistic approach to sustainability when designing our appliances. The key elements of this are the durability of our appliances, maximum energy efficiency and reducing food waste. Why do we do all this? Because a holistic approach is needed to protect both people and the environment in equal measure.

Reducing food waste

Everyone who stores food in the optimum climate plays a big part in reducing unnecessary food waste. Our appliances make this possible – with a combination of innovative features:

First: Our freshness technologies. DuoCooling in our fridge-freezers, for example, prevents your groceries from drying out faster than need be. Innovative freshness technologies such as BioFresh ensure perfect storage conditions that significantly extend product life and freshness. So there's no need to throw food away before its time, and you don't need to go shopping so often. And the largest zero-degree compartments on the market provide enough space for extra-large amounts of groceries.

Second: Our SmartDevice app also helps you to store your food properly, giving your food a longer shelf life so you can enjoy it for even longer.

Third: Our appliances are intelligent and let you know if perfect storage for your groceries is at risk. For example, by using a door alarm to tell you if the appliance door is still open.

Perfectly thought out: a powerful, complete package

Our fridges are real all-rounders. Along with their low power consumption, they also have impressively low noise levels, plenty of space for groceries, a long service life and reliable power reserves for when it really matters. We take account of a great many factors during the development stage and can offer a perfectly balanced appliance. Or to put it another way: all good things come in fours.

Energy consumption

Our refrigerators and freezers occupy top positions in the efficiency rankings. In this way, they protect the precious resources of our environment and – thanks to low electricity costs – your wallet too.

Cooling volume

We have the perfect appliance for all family sizes, lifestyles and niche heights. We make sure that we do not waste a single litre of capacity in the extra-large drawers – right down to the smallest detail, for example with the lighting solutions that have been integrated in the housing to save space.

Noise level

The boundaries between the kitchen and living areas are becoming ever more blurred in modern households. This underlines the importance of particularly quiet appliances. Our range of refrigerators and freezers therefore offers a wide selection of extremely quiet appliances. In some cases, it even reaches the ultra-quiet noise level of 32 db.

Cooling performance

Intelligent sensor technology constantly adapts the cooling performance to current use, making our refrigerators and freezers very energy-efficient and economical in everyday use. At the same time they also have plenty of power in reserve, for example to cool down a large quantity of groceries after the weekly shop.

◇ Plus ◇ Prime

StainlessSteel dry rear wall

EasyTwist Ice

◇ Plus series

The Plus series builds on our Pure series and has many impressive additional details. Above all, Plus means a plus in comfort. The appliances not only provide first-class refrigeration and freezing, they are also just that little bit smarter. They help make operation a little easier.

⬠ Prime series

With the Prime series things get much more classy. It makes an unmistakable mark in terms of design and material. Above all, genuine quality materials are used inside the appliances, such as stainless steel. But special lighting solutions also make the appliances in this series particularly appealing.

BioFresh Fish & Seafood safe

VarioTemp

BioFresh Professional 0°C

-2°C

**Fish &
Seafood**

Unique features

Fish & Seafood safe

Love fish? Your Liebherr keeps fish fresh! The Fish & Seafood safe stores fish and seafood at the optimum temperature of -2°C ; as professionally as your fishmonger. Adjust the size of the -2°C zone as much as you want – and store the remaining meat and dairy products at the optimum 0°C . An LED display indicates that the -2°C zone is currently active.

PowerCooling

Do you want to be sure that the cold is distributed as evenly as possible in your refrigerator? If so, the PowerCooling system is what you need. The fan – as powerful as it is quiet – distributes the cold air efficiently throughout the entire refrigeration compartment.

Touch & Swipe display

Control of your Liebherr at your fingertips: thanks to the Touch & Swipe display, you can operate your refrigerator intuitively and with ease. Simply select functions such as SuperCool on the colour display by tapping and swiping. The temperature is controlled just as easily. And, what if you are not actively using the display? Well, it then shows you the actual temperature.

LightTower

Enjoy an optimally illuminated interior: the LightTower shows off the food in its best light and is positioned so that all of your filled fridge is illuminated at all times. The flush mounting of the LightTower in the side walls means there is also more space for your food.

IceTower

You will never run out of cold drinks at your party. The IceTower, which holds 8 kg of ice cubes, makes sure of that. The ice cube scoop and the pull-out tray on telescopic rails allow easy access to the ice cubes. An extra insert tray means you can also store less ice and make room for frozen food underneath. The adjacent drawer provides storage space for frozen goods.

VarioTemp

VarioTemp means you have plenty of scope when storing food in your fridge freezer. This is because you can also set the accurate temperature in the freezer compartment in a range between -2°C and $+14^{\circ}\text{C}$ – and therefore also use this compartment as a further cooling zone. For example, it can be used over the short term for drinks and snacks at parties – or over the long term as a cellar compartment for storing potatoes.

For the cool gastronomist

The BluPerformance 534.76.731 (XRFbsh 5265) doesn't just unite a fridge and a freezer into a unique side-by-side solution, but also combines modern aesthetics with pioneering functionality.

For example, the spacious refrigerator has variable BioFresh safes that ensure your food stays fresh for a very long time at temperatures just above 0 °C. NoFrost saves you costly and time-consuming freezer defrosting.

Also available in SmartSteel as 534.76.730 (XRFsdh 5265.)

The epicurean's dream kitchen

The 534.76.710 (XCCsdh 5250) side-by-side combination has everything that distinguishes premium refrigerators and freezers: top-quality design and technology down to the finest detail. And all that twice over.

The easily accessible refrigerators in the top part each have a spacious EasyFresh safe, where fruit and vegetables stay as fresh and vitamin-rich as if they were straight from the market. NoFrost technology in the two freezer units below ensures that your food is protected from icing up.

With two separate refrigeration circuits, DuoCooling prevents air exchange between the refrigerator and freezer compartments, thus protecting your food from transferred odours and drying out.

The coolest sous chef

The 534.76.700 (XRFsdh 5220) side-by-side combination shows its strengths in everyday use, with its robust but elegant stainless steel exterior and its variable interior.

Whether refrigerated or frozen – the 534.76.700 (XRFsdh 5220) keeps your food fresh. In the refrigerator, for example, airtight EasyFresh safes ensure that salads stay crisp and fresh even after seven days. NoFrost keeps your frozen food permanently frost-free and saves you the trouble of defrosting the freezer.

Both appliances come with a clearly arranged touch display, and all the functions are right at your fingertips.

BLU
Performance

534.76.630 (SCNs dh 5253) ◊ Prime series

Sweet taste of freshness

The BluPerformance 534.76.630 (SCNsdh 5253) fridge-freezer is a reliable companion for everyday use. The integrated appliance is compact in size, but all the more versatile in the options it offers you.

The refrigerator compartment in the upper part has variable height-adjustable shelves, perfectly illuminated by the innovative Light Tower. An EasyFresh safe ensures that unpackaged foods such as fruit, salads or vegetables retain their natural freshness. And the patented NoFrost technology permanently eliminates the chore of defrosting the freezer.

The two parts of the appliance are cooled by completely separate refrigeration circuits. This technology known as DuoCooling prevents air exchange between the refrigerator and freezer compartments, so your food won't dry out or absorb any unwanted odours.

Professional

BioFresh 0°C

Unique features

PowerCooling

Do you want to be sure that the cold is distributed as evenly as possible in your refrigerator? If so, the PowerCooling system is what you need. The fan – as powerful as it is quiet – distributes the cold air efficiently throughout the entire refrigeration compartment.

LightTower

Enjoy an optimally illuminated interior: the LightTower shows off the food in its best light and is positioned so that all of your filled fridge is illuminated at all times. The flush mounting of the LightTower in the side walls means there is also more space for your food.

Touch & Swipe Display

Control of your Liebherr at your fingertips: thanks to the Touch & Swipe display, you can operate your refrigerator intuitively and with ease. Simply select functions such as SuperCool on the colour display by tapping and swiping. The temperature is controlled just as easily. And, what if you are not actively using the display? Well, it then shows you the actual temperature.

Fish & Seafood safe

BioFresh Professional offers even more flexibility for the individual storage of food. The adjustable temperature range of 0 °C and -2 °C keeps fish and seafood fresh for significantly longer than in a conventional refrigeration compartment. The BioFresh Professional safe includes a versatile Fish & Seafood safe.

IceMaker

Are there any ice cubes left? An IceMaker means you never have to ask. With the IceMaker with fixed water connection, the water comes directly from the tap. The MaxIce function allows you to produce up to 1.5 kg of ice cubes a day. The ice cube separator helps to divide the drawer into any size you want – for example, ice cubes on the left, ice cream on the right – or just for ice cubes.

SuperSilent

Shhh – listen carefully. Your Liebherr is so quiet that you have to strain your ears to hear it. How is this achieved? All refrigeration components such as compressors, valves, fans and evaporators are optimised and perfectly adapted to one another. This means you only hear what you want to hear in your kitchen.

The ultimate indulgence

In the 534.76.580 (IRBh 5170) refrigerator, cold mist from HydroBreeze covers fruit and vegetable like a protective balm in the BioFresh Professional safe. Adjust the temperature down to -2°C to create a low humidity environment for retaining the freshness of your catch of the day in the Fish & Seafood safe.

For parties and gatherings, IceTower in the 534.76.610 (SIFNh 5188) freezer produces up to 1.2 kg of ice cubes daily whereas VarioSpace provides added flexibility for large cakes.

The insulated triple glazed door of our 534.16.770 (EWTdf 3553) dual-zone wine cellar protects your finest collection from UV exposure. Handcrafted beechwood shelves on telescopic rails reduces vibrations, allowing wines to develop in peace.

Built-in luxury

534.76.530 (ICNh 5123) and 534.76.540 (ICNh 5133): models from our new Fully Integrated selection.

This side-by-side fridge-freezer combination offers plenty of storage space with EasyFresh safes that allow different humidity modes for a wide array of fresh groceries. NoFrost technology ensures a permanently frost-free freezer compartment.

Thanks to Liebherr's door-on-door technology, our fully integrated appliances fit perfectly into spacious kitchens and integrate seamlessly into your existing cabinetry.

Being SuperSilent models due to the special design and low-noise components, this combination is extremely quiet. Thanks to our SoftSystem the appliance doors always close gently even when fully loaded.

The smooth operator

A unique pull-out model, the 534.16.680 (SUIKo 1550) Undercounter Fridge serves as a great option for kitchen islands.

Mounted on soft telescopic rails to enhance user-friendliness and convenience, it comes with a practical bottle shelf and removable fruit and vegetable drawer. The large drawer can also be divided into two equal-sized compartments, with further storage space underneath.

SuperCool function quickly reduces temperature which is perfect for rapidly cooling down freshly stored food. The innovative LED light and special satin finish of the light cover produces a pleasant lighting atmosphere.

Technical data see page 98.

Convenience at your fingertips

Our space-saving undercounter appliances are the practical choice for compact living spaces. The 534.16.230 (SUIK 1510) Undercounter Fridge is great for fresh produce with height-adjustable glass shelves to ensure maximise storage flexibility.

The perfect companion for this undercounter fridge is the 534.16.240 (SUIG 1514) Undercounter Freezer with SmartFrost technology, allowing food to freeze faster and reducing ice build-up to make defrosting simpler and quicker.

Both models are equipped with innovative SoftSystem technology which ensures that the appliance door closes gently and automatically from an opening angle of approximately 30°. No ventilation grill is needed in your worktop as airflow enters and exits from the front of both undercounter models.

Unique features

LED lighting

The LED lighting in the individual wine compartments can be dimmed to give a pleasing ambient light inside the appliance. All Vinidor appliances are equipped with this innovative, no-heat LED lighting concept. The LED lighting can also be adjusted to operate continuously or in conjunction with door openings.

Insulated glass door

Liebherr wine cabinets come with insulated glass doors with special UV protection. The double-glazed construction means that most of the damaging UV radiation is reflected away. In addition, LED lighting guarantees perfect illumination of the wine cabinet interior without risk of UV exposure.

FreshAir activated charcoal filter

Environmental odours can have an wine stored for longer periods. Fresh air is supplied to Liebherr wine cabinets through the easily replaceable FreshAir activated charcoalfilter to ensure optimal air quality.

Handcrafted beechwood shelves

Our natural, handcrafted, and untreated beechwood shelves release no chemical aromas into the environment that could adversely influence the flavour of wine. In addition, wooden shelves contribute to the reduction of vibrations which allows wine to develop in peace.

Touch electronic control system

Our touch electronic control system is easy to navigate and enables tailored storage options. Temperature can be set between +5 °C and +20 °C based on your preference. In our multi-temperature models, each wine safe can be controlled independently, allowing different types of wine to be stored in one wine cabinet.

Compressor

Specially developed compressors installed in the wine cabinets from Liebherr ensure that the wines are stored in a particularly low vibration environment.

reddot award 2018
winner

534.16.770 (EWTdf 3553)

Savour the difference with a Liebherr.

Like a shaken bottle of champagne, the 534.16.770 (EWTdf 3553) dual-zone wine cellar is absolutely exploding and overflowing with innovative features.

Its touchscreen controls are integrated into the insulation layer between the temperature zones, allowing you to set two different temperatures within the unit and simultaneously store red and white wines, each at its optimum drinking temperature. An insulated glass door protects your favourite collection from UV exposure while handcrafted beechwood shelves on telescopic rails reduces vibrations, allowing wines to develop in peace.

Seamlessly fit this built-in model into your customised kitchen décor or turn it into a stainless steel masterpiece with our selection of accessories.

534.16.780 (WKEes 553)

Classic and sleek, fits anywhere

Take advantage of the design flexibility of Liebherr's fully integrated 534.16.780 (WKEes 553) Wine Cabinet – Place this sleek, modular model anywhere in your home and proudly display your best wine collection at eye level.

Temperature is adjustable from +5 °C to +20 °C and the LED ceiling light is dimmable to cast a cool glow across the room. The insulated glass door with UV protection and activated charcoal filter protects your wine from light and odour. This compact unit holds up to 18 Bordeaux bottles in an ideal storage environment.

Technical data see page 101.

Liebherr Barrique

Unique features

LED lighting

The tinted glass door provides not only a perfect UV protection, but also an optimum glance at wine. The integrated LED lighting ensures a pleasant illumination of the complete interior.

Precision electronics

The precise electronic control system is equipped with a digital temperature display. The door and temperature alarm alerts of any irregularities, e.g. when the door is left open. The integrated lock on the front panel prevents unwanted access to the stored bottles.

Handcrafted beechwood shelves

Our natural, handcrafted, and untreated beechwood shelves release no chemical aromas into the environment that could adversely influence the flavour of wine. In addition, wooden shelves contribute to the reduction of vibrations which allows wine to develop in peace.

Presentation shelf

The presentation shelf, equipped with wooden angles, is ideal for presenting wine and storing open bottles safely. Up to 6 bottles can be set upright on the flexible shelf. In addition further bottles can be stored lying down either behind or at the side.

Optimum humidity

Liebherr wine cabinets guarantee an optimum humidity and this ensured the corks are supple in place whilst still allowing the wine to breathe in its maturing process.

Activated charcoal filter

The easy replaceable active charcoal filter purifies the incoming air to obtain an optimum odour-free interior.

534.16.895 (WKb 4612)

Perfect display for all your favourites

With the capacity to hold 195 Bordeaux bottles, the spacious Liebherr Barrique 534.16.895 (WKb 4612) Wine Cabinet is ideal for the long-term storage and maturation of wines.

Constant temperature can be set as desired between +5 °C to +20 °C via the intuitive control system with digital temperature display.

Thanks to its coated glass door, wines will always be well-protected from UV radiation. Efficient LED lighting ensures that the interior is illuminated evenly and pleasantly, allowing you to proudly showcase your prized collection.

Technical data see page 104.

Wine storage sophistication for your home

The 534.16.896 (WKb 4611) Wine Cabinet mimics the conditions of an underground wine cellar where its solid door creates a dark, undisturbed environment with zero exposure to UV light and heat fluctuations – perfect for maturing wines.

When humidity level falls below 50 %, natural corks begin to shrink, causing oxygen to enter the bottle and damage stored wines. With a humidity range between 50 % – 80 %, Liebherr wine cabinets guarantee the ideal conditions to preserve the suppleness of wine corks which in turn prevents oxidation.

Your wines are always stored safely on our untreated beech wood shelves while an activated charcoal filter provides optimal air quality.

Technical data see page 104.

534.16.896 (WKb 4611)

Superb conditions for fine wines

Our most compact model from the Liebherr Barrique series, the 534.16.890 (WKb 1712) Wine Cabinet can store up to 60 Bordeaux bottles. Wines are stored optimally on three untreated, height-adjustable beech wood shelves.

Wines are well protected from UV radiation thanks to a tinted insulated glass door while the activated charcoal filter provides optimum air quality and is easy to replace.

Energy-efficient LED lighting ensures even and pleasant illumination so that your favourite bottles are seen in the best light.

Technical data see page 105.

Design and lifestyle

Unique features

LED lighting in humidor

Liebherr's ZKes 453 has LED lighting with dimmer function incorporated in the glass door. As the LEDs emit virtually no heat, the cigars can be exposed to the light for long periods of time without damage.

LED lighting in wine cabinet

For ideal presentation of your best wine, the WKes 653 features LED lighting with dimmer function and separate switch. As the LEDs emit minimal heat and no UV radiation, wine can be showcased bathed in light for lengthy periods without compromising its quality.

Fine cedar wood

Our ZKes 453 humidor features two presentation boxes and two wooden shelves crafted from Spanish cedar wood. The presentation boxes are perfect for storing loose cigars.

Wall mount option

Both the WKes 653 wine cabinet and ZKes 453 humidor can be wall-mounted as an attractive eye-catcher with convenient access for serving.

Ideal humidity

The integrated water tray can accommodate one liter of distilled water for ideal humidity. Sensors regulate precise humidity level selected. The display informs when water needs to be replenished.

Touch electronic control system

The perfect wine storage temperature is +8 °C to +12 °C. White wine should ideally be stored below +10 °C and red wine at up to +18 °C. Our electronic control system allows temperature to be set to the exact degree required between +5 °C to +20 °C.

Cigar

534.16.750 (WKes 653) | 534.16.690 (ZKes 453)

The perfect indulgence

The 534.16.690 (ZKes 453) Humidor offers the perfect micro-climate for storing beloved cigars through fully-customisable humidity settings. Natural, handmade cigars are both delicate and sensitive, requiring a balanced mix of temperature and humidity to achieve the optimum flavour. The compartments in our humidor are crafted from Spanish cedar wood which allows its aroma to enhance the unique flavour of refined cigars.

For the perfect indulgence, pair the humidor with our 534.16.750 (WKes 653) Wine Cabinet. It has a compact footprint yet manages to hold up to 12 Bordeaux bottles. LED lighting and dimmer function ensures perfect illumination for your selection of coveted wines.

Coated with a beautiful SmartSteel surface, both units are easy to clean and maintain. Opt to wall-mount this stunning pair to give it the attention it deserves.
