Digital door lock
Model DL6500

DL6500
User manual

* The contents of this user manual are subject to change without prior notice
  to the user in order to enhance performance of the products.

Product features

3 WAY OPEN
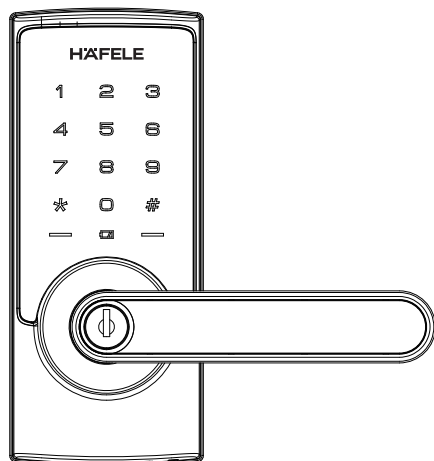

Three way solution
Three electronic locking modes: PIN code, APP and emergency key.

1 2 3 4 5 6

Master PIN code/ User PIN code identification
1 master PIN code, up to 20 user PIN codes.

1 2 3 4 5 6

Random security coding function
A random number can be added before or after the real user PIN code but the maximum length is 20 digits.
This feature will prevent the real user PIN code from being exposed.

Prevent mischief and hacking
When entering 10 times a wrong user PIN code, the lock is suspended for 3 mins. After that, the lock will activate again. While the lock is suspended, the screen will flash when you are trying to use the keypad.

Indicate

Alarm for battery replacement time
When the power of the battery is too low a warning signal will appear on the screen.
Please replace all batteries immediately.
