◄— Magnet Location

Check Points after Installation

1) Check if the Auto Locking function works

   If the door does not lock automatically when latched, please check the Auto Locking setting

2) Check if Manual and Auto Locking work

3) Check if the door unlocks by registered RFID card

4) After PIN code registration, check if the door unlocks by PIN code

   The PIN code must be input directly by the end user of the door lock

5) Explain the internal double locking function.

6) Explain the battery life and how to use the external emergency power connector.

7) Thoroughly explain the RFID card registration and PIN code modification process.

8) Provide the customer with the product warranty and the user manual.

M / A

Activating Manual Locking Mode
After removing the battery cover, look for the Auto Locking switch. Move the switch up to activate manual locking mode.

M / A

Activating Auto Locking Mode
After removing the battery cover, look for the Auto Locking switch. Move the switch down to activate auto locking mode.

Attention – Perform Installation only when Door is Open and with all Batteries Removed.
